If you can propose some times for Friday, Kelly and I can compare calendars and set something up. Sooner the better.

John

Eric,

I would definitely like to get the skinny on this, but it would have to be tomorrow afternoon on Monday. Morning is booked.

FYI, the GMO Beyond the Science has been translated into Spanish (or will be in next few days) and we will be posting a Spanish version on our website.

Is there any interest in expanding/following up on that project.

Since last fall, our traffic has expanded dramatically. Even had two days with more than 100,000 hits.

Jon

Jon – I don't have phone numbers, only e-mails for Bill et al. Honestly, I know they are seeing my messages because they have responded on other topics. Let's give it through tomorrow.

On the topic of IARC, I really think you are going to want to cover this topic. Would you be available to talk with Kelly and John (copied) tomorrow, ideally in the morning? They are much closer to the entire process than I am.

Best,
Eric

Erich:

I appreciate the follow up.

Can I call Bill's assistant and/or publisher to gauge the situation as when a reply might be forthcoming...it shouldn't fall on your shoulders. I can get Pam Ronald to call...that might elicit a response, or at least a heads up as to when a response might be forthcoming.

As for IARC, I have not been tracking it at all. What is expected? How do you know what might be expected?

Jon

Jon –

Still no word from Bill Nye. I sent another message requesting a response to Bill, and copied his assistant and his publisher.

Are you tracking the exchanges about IARC and its review of glyphosate and other pesticides? We have a team that has followed closely the meeting and panel discussion. I am certain you are going to want to weigh in on the decision.

The story could break as early as next week. It is 'technically' embargoed pending official communication by IARC but it is hard to predict when they will move.

Eric
