Comment:
This assay is performed at both Regional Laboratoy and Facility Laboratories using DIFFERENT methods and DIFFERENT reference ranges. Values for this assay should be interpreted with caution when serially monitoring patients or viewing trended data displays. When performed at TPMG Regional laboratory, MWS, the LD-4 and LD-5 fractions (in liver and skeletal muscle) may be decreased due to refrigeration; this may lower the total LD value.

GLOMERULAR FILTRATION RATE - AFRICAN AMERICAN	>60	>=60 mL/min	—	458
Comment, glomerular filtration rate	SEE NOTE	—	—	458

Comment:
Glomerular Filtration Rate (GFR) estimate is expressed in mL/min/1.73 m2 body surface area. A GFR estimate is validated only for patients greater than or equal to 18 years of age. Since this test is not useful if renal function is changing rapidly, a GFR estimate is not reported for inpatients. Many elderly patients have mildly to moderately reduced GFR. Per K/DOQI Clinical Practice Guidelines on Chronic Kidney Disease: GFR 30 - 59 = Stage 3 CKD GFR 15 - 29 = Stage 4 CKD GFR < 15 = Stage 5 CKD
