“Thymatron® System IV: The most advanced ECT device technically and operationally, with demonstrated superior safety and clinical effectiveness.”

SAFE, TIME-SAVING DISPOSABLES FOR ECT

#EPAD

THYMAPAD™ Adherent Stimulus Electrodes

Thymapads™ are much faster and easier to use than the old-fashioned disk, headstrap, and jelly method.

They remain exactly where applied and have no exposed metal surfaces to cause accidental shocks. There’s no mess to clean up afterwards, nothing to wash, dry, or sterilize, no sticky hands - just remove them and discard.

Thymapads™ flexibly conform to the surface of the head and fit all Mecta machines too.

VENTIL-A™ Mouth Protector

The *Ventil-A™*'s thick 100% closed-cell foam construction protects all the teeth. Fits easily under any anesthesia mask and features a non-collapsible air channel for free flow oxygen. One-piece design for dimensional stability and looped end for fast and easy insertion/removal. One size fits >98% of adults.

Both of these single-use ECT aids (US Patent 6039046) save the time and expense of washing and sterilization and eliminate the risk of cross-infection that occurs with re-usable products.
